

**2021-2022**

# Mini Science Challenge

**- FREE Program for 4th, 5th, & 6th Grade Students -**

Interested in a fun, hands-on program for your class? The Rowland Water District's Mini Science Challenge is just that!

The Mini Science Challenge is a 4th-6th grade Project Based Learning program. Students will have the opportunity to compete in a new challenge each month (5 months in total) against other students from their same grade and from schools across the RWD service area.

1st-3rd place winners in each grade level will be selected in the following categories: Hands-on Experiment, Writing Challenge, and the Public Service Announcement (PSA). This program is aligned to grade appropriate standards and will challenge students with all aspects of Science, Technology, Engineering and Math (STEM).

A presentation to go over the entire program will be held via ZOOM on October 7, 2021 at 3:00 PM.

Applications for the program will be due to Brittnie Van De Car on October 6, 2021 by 3:00 PM! You will be registered for the presentation once the application is completed and Brittnie will email you the Zoom information.

Complete the application online at
